

# SUPER JUMPING FROG

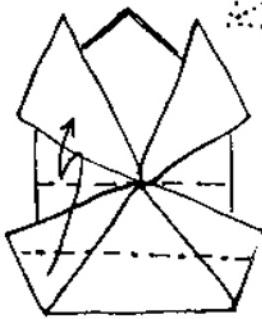

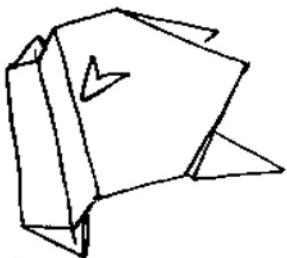

This variation of the traditional jumping frog was designed by Yumi Yamauchi and diagrammed by A.F. Barbour.

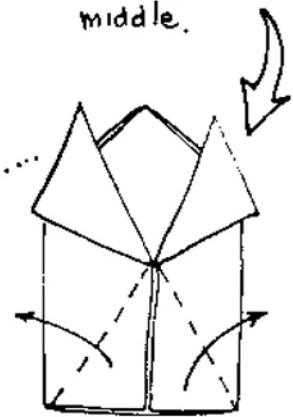

- ③ VF sides  
to meet in  
middle.

- ① Start with a  
3x5" file card.  
Fold a waterbomb  
base at one end.

- ② a) Valley-  
fold arms.  
b) VF lower  
edge to WBB.

- ⑤ Pleat +  
turn over.

- ④ VF back  
legs (this is  
the departure from  
the traditional  
model. The extra  
thickness gives it  
more spring.)

- ⑥ Push down on back  
& release - the frog  
will jump high &  
far. Fold a tiny one  
and it will surprise you.
